

FLUKA™

**REMARKABLE IS BUILT
ON RELIABILITY**

ESSENTIAL ACIDS, BASES, BUFFERS, SALTS, & HIGH-PURITY SOLVENTS FOR ANALYTICAL CHEMISTRY

Within analytical laboratories, inconsistencies can wreak havoc quickly. From preparing standards to performing trace-level tests, scientists often struggle with variable purity in their essential acids, bases, and salts.

If routine chemicals fail to meet rigorous specifications or lack lot-to-lot reproducibility, it introduces doubt into even the most controlled workflows. That risk of failed validations and unreliable data can slow momentum and increase development costs in any environment.

Fluka™ is the reliable workhorse modern laboratories depend on to avoid these risks. As a comprehensive portfolio of essential acids, bases, buffers, salts, and high-purity solvents, Fluka is designed to excel under the daily demands of analytical chemistry. Manufactured under ISO 9001-certified quality systems, every product undergoes strict testing for purity, concentration, and trace-level metals to ensure the analytical consistency and reproducible results that researchers require.

Building on more than a century of trusted performance, Fluka has been cited in thousands of peer-reviewed articles and validated in industry standards worldwide. Every lot also comes with extensive documentation, including detailed Certificates of Analysis (CoAs) and Safety Data Sheets (SDSs). Across academic, industrial, and regulatory laboratories, Fluka provides the purity grades that are essential for every scale of operation.

The result is dependability in a bottle, giving your team the confidence to move discovery forward and deliver accurate, reliable work, day after day.

PRODUCT LINE AT A GLANCE

Acids

For precise analytical preparation in routine and regulated methods

Bases

For reliable pH control, neutralization, and quantitative analysis

Buffers

For stable pH control and reproducible conditions in analytical methods, calibration procedures, and quality control testing

Salts

For standards preparation, method development, and routine testing

High-purity solvents

For accurate measurements across a broad range of analytical applications

Standards

For confident calibration, instrument verification, and traceable results

Scan or click the QR code to download the complete catalog of more than 2,000 products, searchable by application, purity grade, specification, packaging options, and additional options.

Need technical support?

Built on more than a century of analytical chemistry expertise, Fluka is backed by specialists who understand the daily demands of modern laboratories. From routine analyses to validated methods in regulated environments, our expertise helps ensure your inputs deliver consistent, dependable performance. Day after day.

If you're looking to maintain analytical confidence or resolve method challenges, we can support you with:

- Selecting the right product for your analytical method
- Troubleshooting challenges (e.g., concentration accuracy, stability, reproducibility)
- Guidance for method compatibility, optimization, and routine validation
- Finding documentation and certificates to support regulatory and compliance requirements
- Accessing technical expertise, application guidance, and trusted reference data
- Developing a custom Solstice LabReady™ product in direct collaboration with your team
