

CONFLICT MINERALS STATEMENT

Solstice Advanced Materials is committed to the responsible sourcing of tin (cassiterite), tungsten (wolframite), tantalum (columbite-tantalite or coltan), gold, and cobalt or their derivatives (collectively known as “3TG” and Cobalt) throughout our global supply chain in a manner that complies with applicable laws.

In 2012, the U.S. Securities and Exchange Commission (“SEC”) issued rules implementing the “conflict minerals” disclosure requirements of the Dodd-Frank Wall Street Reform and Consumer Protection Act which set forth disclosure requirements regarding due diligence steps taken to determine if any of its products contain 3TG originating in the Democratic Republic of the Congo or adjoining countries (“covered countries”).

In 2017, the European Parliament and the Council issued Regulation (EU) 2017/821 which sets forth supply chain due diligence obligations for European Union importers of 3TG originating from conflict-affected and high-risk areas (“CAHRAs”).

In addition, the Responsible Business Alliance (RBA) Code of Conduct Version 8.0.2 (2025) expands the scope of responsible mineral sourcing to include cobalt, requiring companies to conduct supply chain due diligence in alignment with the OECD Due Diligence Guidance and to ensure that cobalt is sourced responsibly from conflict-affected and high-risk areas.

These rules require certain Solstice Advanced Materials direct or indirect subsidiaries to undertake reasonable due diligence steps to determine the origin of the 3TG and cobalt used in its products and disclose the results of such diligence.

Solstice Advanced Materials’ 3TG and Cobalt compliance program is designed to conform to the Organization for Economic Co-operation and Development’s “Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected Areas and High-Risk Areas” and includes the following partner-related elements:

1. Communication of Solstice Advanced Materials’ requirements for responsible sourcing to our global supply chain via our Partner Code of Business Conduct.
2. Flow down of a 3TG and Cobalt compliance provision in purchase agreements with direct material partners.
3. Collection of information on 3TG and Cobalt in the supply chain using the Conflict Minerals Reporting Template (CMRT) and the Extended Minerals Reporting Template (EMRT) developed by the Responsible Minerals Initiative (RMI).

4. Review of partner responses against criteria developed to determine which responses require further engagement with partners.
